| No 911 Outages      | No 911 Outages     | 911 Outages         |

## 911 Outages/Remote/Community Isolations:

### **Montecito, Santa Barbara County**

On 12/17/17 at 0633 hours. The CSWC was notified that the Montecito Fire Protection District 9-1-1 call taking equipment was down due to UPS failure.

- Call taking is being handled at Santa Barbara County Sheriff. Support is being provided by Montecito FPD staff that have relocated to the Sheriff's Department.

As of 12/16/17 at 1838 hours, the CA 911 Branch reported that Montecito Fire Protection District 9-1-1 has returned to their building, but they are still having trouble with their call taking equipment.

- They will open a ticket with their vendor to resolve the issue.
- Santa Barbara County Sheriff covers the Montecito and Summerland jurisdiction, and they are fully operational.

### **Santa Paula, Ventura County 911 Outage**

On 12/05/17, the Frontier Santa Paula remote central office in Ventura County reported that 329 landlines had no dial tone due to power failure as a result of the Thomas Fire. Currently, these customers are unable to dial out to 911. However, wireless service is not impacted at this time. The Public Safety Answering Point (PSAP), Ventura County Sheriffs Office (VCSO), are taking calls normally and have been notified of the isolation.

- Per the CA 911 Branch on 12/17/17 at 1838 hours:
  - Per Frontier, the Topa Hut remote office has been temporarily restored through a microwave shot from the South Mountain.
  - Dial tone is restored for customers with access lines and wiring that is in tact.
    - Individual customers with damaged distribution lines are still out of landline service.
  - Destroyed lines and poles in the area will need to be repaired before service can be re-established fully.
  - Repair work is in progress, as some access to the affected area is now being granted.
  - Frontier Communications teams continue to assess damage when allowed into affected areas and have replaced 17-poles thus far.
  - No ETTR has been provided at this time for full restoral.

## **California 911 System (cont.)**

### **Service Interruptions:**

Per the CA 911 Branch on 12/14/17 at 1844 hours:

Due to massive infrastructure damage caused by the Thomas Fire, the ongoing wireline community isolation in Santa Paula will not be resolved in the immediate future.

- A temporary microwave solution is being stood up in the area, however even with the microwave solution, those individuals customers with damaged distribution lines will still be out of landline service.
- No ETTR has been provided at this time.

# WEATHER OF CONCERN

## Weather of Concern

- Gusty Santa Ana winds will continue through 8 PM PST this evening. The combination of gusty northeast winds, low relative humidities and very dry fuels will maintain extreme fire danger through this time.
- Winds should subside later tonight into Monday, and onshore flow will provide better humidity recovery through Tuesday.
- Longer range forecasts are calling for another potentially strong northerly wind event Wednesday into Thursday, affecting Southern Santa Barbara County and portions of Los Angeles and Ventura Counties.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

\*\*\* High Risk continues this morning for strong gusty N-NE/Offshore winds across Bay Area, Diablo-Santa Cruz Mountains, SW Sacramento Valley, and SE Mid Coast PSA's \*\*\*

Residual gusty N to NE and even offshore flow will affect a large portion of the North Ops region this morning. Then speeds will gradually lower this afternoon. Gusts between 20 to 30 mph will be commonplace with peak values as high as 40 mph favoring the higher ridgetops found within the Bay Marine, Diablo-Santa Cruz PSA's as well as along the west slopes of the Cascade-Sierra ranges and within portions of the Sacramento Valley. Humidity values will also be marginally low with values in the 20s and 30s and some isolated upper teens. A High Risk has been designated for the portions of the Sacramento Valley, Mid Coast, Bay Area and Diablo-Santa Cruz Mountains PSA's this morning.

Winds will be much lighter on Monday as the ridge takes over. A gustier southerly flow should develop across the far north and over the higher Cascade and Sierra ranges Tuesday and Tuesday night as a Pacific system approaches. Downslope wind gusts between 30 to 40 mph will be possible in the Weed area by the afternoon. Humidity values will remain marginally low, except for along the coast, with afternoon readings in the 20 and 30s during this period. Another potent cold frontal passage is expected Wednesday. This system appears to be cooler and have more moisture with the frontal passage compared to its predecessor. The best chance for wetting precipitation would be found across the North Coast...Northwest Mountains and Northern Sierra PSA's. Conditions would become drier with lowering humidity and residual gusty N to NE and offshore winds Thursday and Friday. A drier N to NE flow pattern should remain into the weekend.

## **SOUTHERN CALIFORNIA**

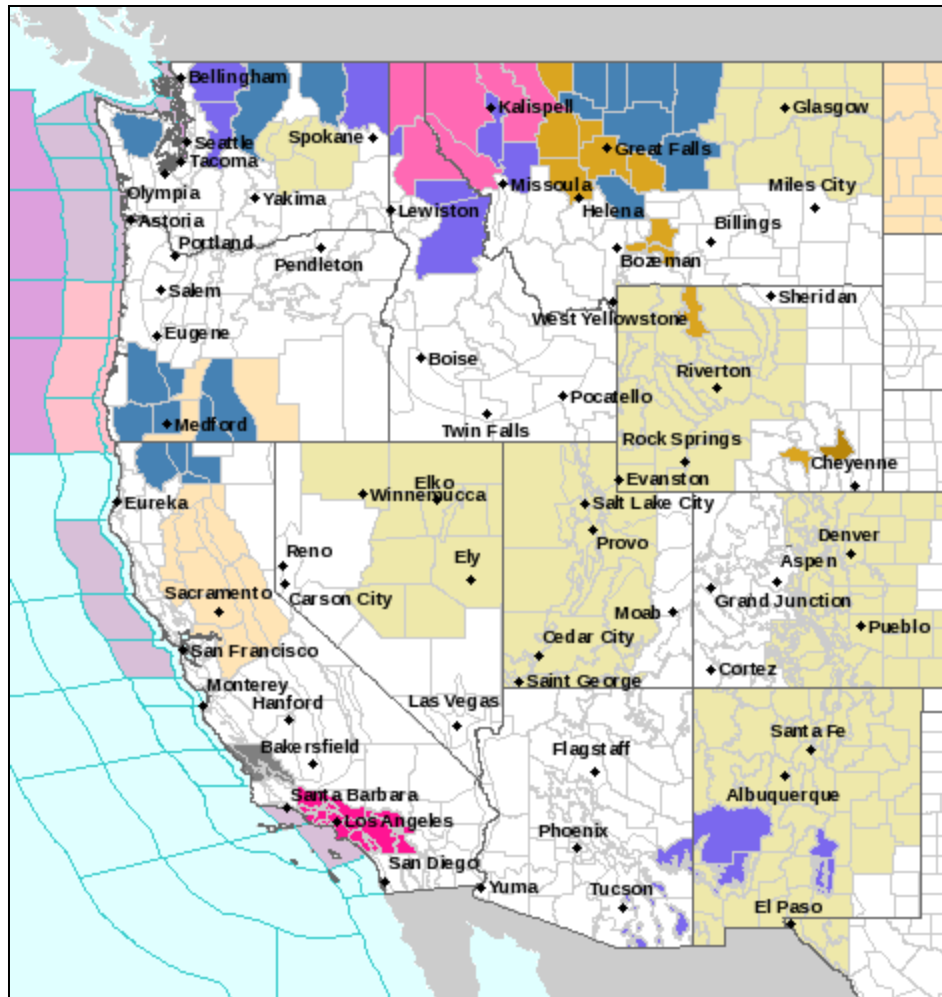

\*\*\*Strong offshore winds across Southern California through this afternoon\*\*\*

\*\*\*Moderate to strong offshore winds possible Wednesday night through Friday morning\*\*\*

Strong surface high pressure over the Great Basin will bring northeast winds of 20 to 30 mph with gusts to 50 mph to the mountains and below the canyons and passes of Southern California through this afternoon. There will also be local offshore winds of 10 to 20 mph with gusts to 35 mph over Central California and the deserts through this afternoon. Winds will decrease and become more localized across Southern California this evening through Monday morning as surface high pressure weakens. Winds will become light across the entire region by Monday afternoon. The back side of a Pacific trough will bring near to a little above normal temperatures today, with 40s to low 50s across the mountains and 60s to low 70s in the valleys. Temperatures will warm several degrees both Monday and Tuesday as a ridge of high pressure aloft moves inland over California. Minimum humidity will be mainly between 15% and 30% today and then drop into the teens Monday and Tuesday. A trough will move inland into the Pacific Northwest and then drop into the Great Basin causing temperatures to cool to near normal. Scattered snow showers with light accumulations will be possible over the Sierra Wednesday. This trough will also bring westerly winds of 20 to 30 mph with gusts to 50 mph to the wind prone mountain and desert areas Wednesday. Offshore flow will occur behind this trough Wednesday night through the end of this week, but the strength and duration of this event is in question depending on the exact track of the trough. Temperatures will warm Friday through next weekend as a ridge builds off the California Coast.
